Education

Stanford University, Ph.D. Psychology (Cognitive), 2015-2020

- Center for Mind, Brain, Computation, and Technology Trainee.
- Minor in Computer Science.

UC Berkeley, B.A. Mathematics & Physics, 2010-2014

Research Positions

Senior Research Scientist, DeepMind, March 2022 - Present

Research Scientist, DeepMind, October 2020 - February 2022

PhD Intern, DeepMind, May 2019 - September 2019

PhD Software Engineering Intern, Google Brain, June 2017 - September 2017

Associate Professional Staff I, Johns Hopkins University Applied Physics Laboratory, June 2014 - July 2015

Student Research Associate, Lawrence Berkeley National Laboratories, January - May 2012 & August - December 2012

Summer Research Intern, A*STAR Institute of High Performance Computing, Singapore, June - August 2012

Research Assistant, UC Davis Plant Sciences, June - August 2011

Honors

Cognitive Science Society Robert J. Glushko Dissertation Prize, 2021

Ric Weiland Graduate Fellowship in the Humanities and Sciences, 2018-2020

National Science Foundation Graduate Research Fellowship, 2015-2018

Percy Lionel Davis Award for Excellence in Scholarship in Mathematics, 2014

Berkeley Physics Olsen Scholar 2013-2014

Berkeley Letters & Science Dean's List 2012-2014

Berkeley Physics Undergraduate Research Scholar, Spring & Fall 2012

Selected Publications

Andrew K. Lampinen, Ishita Dasgupta, Stephanie C. Y. Chan, Kory Matthewson, Michael Henry Tessler, Antonia Creswell, James L. McClelland, Jane X. Wang, Felix Hill (2022), "Can language models learn from explanations in context?", *Findings of EMNLP 2022*

Allison C. Tam, Neil. C. Rabinowitz, **Andrew K. Lampinen**, Nick A. Roy, Stephanie C. Y. Chan, DJ Strouse, Jane X. Wang, Andrea Banino, Felix Hill (2022), "Semantic exploration from language abstractions and pretrained representations", *Advances in Neural Information Processing Systems*

Selected Preprints

Andrew K. Lampinen (2022), “Can language models handle recursively nested grammatical structures? A case study on comparing models and humans”, *arXiv*

Aaditya K. Singh, David Ding, Andrew Saxe, Felix Hill, **Andrew K. Lampinen** (2022), “Know your audience: Specializing grounded language models with the game of Dixit”, *arXiv*

Adam Santoro*, **Andrew K. Lampinen***, Kory Mathewson, Timothy Lillicrap, David Raposo, (2021), “Symbolic Behaviour in Artificial Intelligence”, *arXiv*, (*equal contribution)

Andrew K. Lampinen and James L. McClelland, (2017), “One-shot and few-shot learning of word embeddings”, *arXiv*

Invited Talks

“Language models show human-like content effects on reasoning”, *London Machine Learning Meetup*, November 2022

“Augmenting reinforcement Learning with language”, *University of Edinburgh Computational Cognitive Science Seminar*, November 2022

“Compositionality (avoiding the question)”, *Brown University*, October 2022

“Augmenting reinforcement learning with language”, *University of Tokyo, Matsuo Lab*, August 2022

“Tell me why—Explanations improve learning of relational and causal structure”, *NYU Concepts & Categories Seminar*, February 2022

“A computational framework for learning and transforming task representations”, *Cognitive Science Society Glushko Dissertation Prize Talk*, July 2021

“Task relationships, task transformations, and analogies”, *Analogical Minds Seminar*, May 2021

“Multi-task learning, transfer, and abstraction”, *Parallel Distributed Processing and the Emergence of an Understanding of Mind*, Princeton University, September 2018

“The Jabberwocky: One-shot and few-shot learning of word embeddings”, *Meaning in Context Workshop*, Center for the Study of Language and Information, Stanford University, September 2017

Teaching Experience

Teaching Assistant, Stanford University Department of Psychology, 6 courses between Fall 2016 and Winter 2019

- Planned and taught discussion sections for undergraduate statistics & memory courses and graduate statistics & research methods courses.
- Gave lectures on reinforcement learning and wrote and graded homeworks for graduate course on Neural Network Models of Cognition.
- Held office hours.

Undergraduate Student Instructor, UC Berkeley Mathematics, Spring, Fall 2013, & Spring 2014

- Planned and taught discussion sections.
- Held office hours.
- Wrote and graded quizzes and midterms.

Teaching Assistant, UC Berkeley Early Academic Outreach Program, June-July 2013

- Held office hours.
 - Substitute taught classes.
-

Other Work Experience

Statistics Consultant, Stanford University Department of Psychology, 2016-2017, 2019-2020

- Advised graduate students on technical aspects of data collection, analysis, and modeling.
-

Service

Reviewer:

- Artificial Intelligence
- Nature Machine Intelligence
- Neural Information Processing Systems, 2020-

- International Conference on Learning Representations, 2020-
 - International Conference on Machine Learning, 2021-
 - Cognitive Science Society, 2019-
 - Deep Reinforcement Learning Workshop at NeurIPS, 2020-
 - Conference on the Mathematical Theory of Deep Neural Networks (DeepMath), 2019
 - Journal of Educational Psychology
-

Technical Skills

Computer science: Experienced with both theory and practice.

- Graduate coursework in machine learning, neural networks, and probabilistic models & algorithms.
- Experienced user of Python, R, C++, C, JavaScript, Matlab, some knowledge of Mathematica, Macaulay2, Haskell.
- Used many common libraries for these languages, e.g. numpy, scipy, tidy, dplyr, jquery, matplotlib, Matlab Computer Vision Toolbox, FFTW.
- Used many machine learning libraries, including TensorFlow, Torch, scikit-learn, and Caffe.
- Experienced with *NIX operating systems.

Mathematics: Knowledge across many domains, with applications.

- Algebraic geometry, group theory, category theory, topology, etc.
- Practical applications to machine learning, computer vision, neural coding, etc.

Statistics: Significant experience with standard data analysis techniques.

- Linear modeling, hierarchical modeling, etc.
- Fitting algorithms & goodness-of-fit tests.

Physics: Experienced in a wide variety of applied and experimental contexts.

- Statistical mechanics, biophysics, analytic mechanics, etc.
- Experimentation ranging from NMR to quantum entanglement.

Modeling & Simulation: Developed models and simulations of various phenomena.

- Developed both from published methods and directly from physical principles.
-

Other Activities

Carillon: Carillonneur member of the Guild of Carilloneurs in North America (www.gcna.org).

Rock climbing: Bouldering, sport, and trad. Former routesetter at Stanford Climbing Wall, set problems for Collegiate Climbing Series events.
