## Education

**Stanford University**, Ph.D. Psychology (Cognitive), 2015-2020

- Center for Mind, Brain, Computation, and Technology Trainee.
- Minor in Computer Science.

**UC Berkeley**, B.A. Mathematics & Physics, 2010-2014

---

## Honors

Cognitive Science Society Robert J. Glushko Dissertation Prize, 2021  
Ric Weiland Graduate Fellowship in the Humanities and Sciences, 2018-2020  
National Science Foundation Graduate Research Fellowship, 2015-2018  
Percy Lionel Davis Award for Excellence in Scholarship in Mathematics, 2014  
Berkeley Physics Olsen Scholar 2013-2014  
Berkeley Letters & Science Dean's List 2012-2014  
Berkeley Physics Undergraduate Research Scholar, Spring & Fall 2012

---

## Research Positions

**Senior Research Scientist**, DeepMind, March 2022 - Present

**Research Scientist**, DeepMind, October 2020 - February 2022

- Research on generalization, language, grounding, and memory.

**PhD Researcher**, Stanford University Department of Psychology, August 2015 - August 2020

- Empirical and theoretical investigations of generalization, transfer, and abstraction in deep learning models.
- Research on reducing the quantity of data required to train a deep learning system, including transfer, memory, and curriculum learning.
- Research on zero-shot performance of new tasks by transforming task representations.
- Experiments to investigate the effects of presentations of concepts on learning of related concepts in mathematical cognition.

**PhD Intern**, DeepMind, May 2019 - September 2019

- Explored automated curriculum generation for goal-conditioned reinforcement learning.
- Explored generalization in reinforcement learning.

**PhD Software Engineering Intern**, Google Brain, June 2017 - September 2017

- Designed and developed a system for using low-quality data from human interactions to improve an adversarially trained image generative model.
- Contributed gradients to TensorFlow image resizing ops.

**Associate Professional Staff I**, Johns Hopkins University Applied Physics Laboratory, June 2014 - July 2015

- Worked on image classification using convolutional neural networks.
- Developed models and simulations of sensor systems, shipping and transportation, and autoimmune diseases.
- Devised metrics for assessing sensors.
- Worked on methods for identifying malicious software based on its behavior.

**Student Research Associate**, Lawrence Berkeley National Laboratories, January - May 2012 & August - December 2012

- Developed simulations of processes in nuclear physics.
- Engineered software and hardware for efficiently collecting & analyzing data.

**Summer Research Intern**, A\*STAR Institute of High Performance Computing, Singapore, June - August 2012

- Wrote and adapted simulations of crystallization processes in super-cooled metals.
- Developed software for analyzing and visualizing the structure of crystals.

**Research Assistant**, UC Davis Plant Sciences, June - August 2011

- Developed procedures and software for testing the physical attributes of fruit.

---

**Publications and Proceedings**

**Andrew K. Lampinen**, Stephanie C. Y. Chan, Andrea Banino, Felix Hill (2021), “Towards mental time travel: a hierarchical memory for reinforcement learning agents”, *Advances in Neural Information Processing Systems*

**Andrew K. Lampinen**, Stephanie C. Y. Chan, Adam Santoro, Felix Hill, (2021), “Publishing fast and slow: A path towards generalizability in psychology and AI”, Commentary in *Behavioral and Brain Sciences*

## Invited Talks

“Tell me why—Explanations improve learning of relational and causal structure”, *NYU Concepts & Categories Seminar*, February 25th, 2022

“A computational framework for learning and transforming task representations”, *Cognitive Science Society Glushko Dissertation Prize Talk*, July 29th, 2021

“Task relationships, task transformations, and analogies”, *Analogical Minds Seminar*, May 13th, 2021

“Multi-task learning, transfer, and abstraction”, *Parallel Distributed Processing and the Emergence of an Understanding of Mind*, Princeton University, September 29th, 2018

“The Jabberwocky: One-shot and few-shot learning of word embeddings”, *Meaning in Context Workshop*, Center for the Study of Language and Information, Stanford University, September 12th, 2017

---

## Teaching Experience

**Teaching Assistant**, Stanford University Department of Psychology, 6 courses between Fall 2016 and Winter 2019

- Planned and taught discussion sections for undergraduate statistics & memory courses and graduate statistics & research methods courses.
- Gave lectures on reinforcement learning and wrote and graded homeworks for graduate course on Neural Network Models of Cognition.
- Held office hours.

**Undergraduate Student Instructor**, UC Berkeley Mathematics, Spring, Fall 2013, & Spring 2014

- Planned and taught discussion sections.
- Held office hours.
- Wrote and graded quizzes and midterms.

**Teaching Assistant**, UC Berkeley Early Academic Outreach Program, June-July 2013

- Held office hours.
- Substitute taught classes.

---

## Other Work Experience

**Statistics Consultant**, Stanford University Department of Psychology, 2016-2017, 2019-2020

- Advised graduate students on technical aspects of data collection, analysis, and modeling.

---

**Service****Reviewer:**

- Artificial Intelligence
  - Neural Information Processing Systems, 2020
  - International Conference on Learning Representations, 2020-
  - International Conference on Machine Learning, 2021-
  - Cognitive Science Society, 2019-
  - Deep Reinforcement Learning Workshop at NeurIPS, 2020-
  - Conference on the Mathematical Theory of Deep Neural Networks (DeepMath), 2019
  - Journal of Educational Psychology
- 

**Technical Skills**

**Computer science:** Experienced with both theory and practice.

- Graduate coursework in machine learning, neural networks, and probabilistic models & algorithms.
- Experienced user of Python, R, C++, C, JavaScript, Matlab, some knowledge of Mathematica, Macaulay2, Haskell.
- Used many common libraries for these languages, e.g. numpy, scipy, tidy, dplyr, jquery, matplotlib, Matlab Computer Vision Toolbox, FFTW.
- Used many machine learning libraries, including TensorFlow, Torch, scikit-learn, and Caffe.
- Experienced with \*NIX operating systems.

**Mathematics:** Knowledge across many domains, with applications.

- Algebraic geometry, group theory, category theory, topology, etc.
- Practical applications to machine learning, computer vision, neural coding, etc.

**Statistics:** Significant experience with standard data analysis techniques.

- Linear modeling, hierarchical modeling, etc.
- Fitting algorithms & goodness-of-fit tests.

**Physics:** Experienced in a wide variety of applied and experimental contexts.

- Statistical mechanics, biophysics, analytic mechanics, etc.
- Experimentation ranging from NMR to quantum entanglement.

**Modeling & Simulation:** Developed models and simulations of various phenomena.

- Developed both from published methods and directly from physical principles.
- 

**Other Activities**

**Carillon:** Carillonneur member of the Guild of Carilloneurs in North America ([www.gcna.org](http://www.gcna.org)).

**Rock climbing:** Bouldering, sport, and trad. Former routesetter at Stanford Climbing Wall, set problems for Collegiate Climbing Series events.
