Education

Stanford University, Ph.D. Psychology (Cognitive), 2015-2020

- Dissertation: A computational framework for learning and transforming task representations
- Advisor: James L. McClelland.
- Center for Mind, Brain, Computation, and Technology Trainee (Co-Mentor: Surya Ganguli).
- Minor in Computer Science.

UC Berkeley, B.A. Mathematics, Physics, 2010-2014

- Highest honors in mathematics, high distinction in general scholarship.

Honors

Ric Weiland Graduate Fellowship in the Humanities and Sciences, 2018-2020
National Science Foundation Graduate Research Fellowship, 2015-2018
Percy Lionel Davis Award for Excellence in Scholarship in Mathematics, 2014
Berkeley Physics Olsen Scholar 2013-2014
Berkeley Letters & Science Dean's List 2012-2014
Berkeley Physics Undergraduate Research Scholar, Spring & Fall 2012

Research Experience

Research Scientist, DeepMind, October 2020 - Present

- Research on generalization, language & grounding.

PhD Candidate, Stanford University Department of Psychology, August 2015 - Present

- Empirical and theoretical investigations of generalization, transfer, and abstraction in deep learning models.
- Research on reducing the quantity of data required to train a deep learning system, including transfer, memory, and curriculum learning.
- Research on zero-shot performance of new tasks by transforming task representations.
- Experiments to investigate the effects of presentations of concepts on learning of related concepts in mathematical cognition.

PhD Intern, DeepMind, May 2019 - September 2019

- Explored automated curriculum generation for goal-conditioned reinforcement learning.
- Explored generalization in reinforcement learning.

PhD Software Engineering Intern, Google Brain, June 2017 - September 2017

- Designed and developed a system for using low-quality data from human interactions to improve an adversarially trained image generative model.
- Contributed gradients to TensorFlow image resizing ops.

Associate Professional Staff I, Johns Hopkins University Applied Physics Laboratory, June 2014 - July 2015

- Worked on image classification using convolutional neural networks.
- Developed models and simulations of sensor systems, shipping and transportation, and autoimmune diseases.
- Devised metrics for assessing sensors.
- Worked on methods for identifying malicious software based on its behavior.

Student Research Associate, Lawrence Berkeley National Laboratories, January - May 2012 & August - December 2012

- Developed simulations of processes in nuclear physics.
- Engineered software and hardware for efficiently collecting & analyzing data.

Summer Research Intern, A*STAR Institute of High Performance Computing, Singapore, June - August 2012

- Wrote and adapted simulations of crystallization processes in super-cooled metals.
- Developed software for analyzing and visualizing the structure of crystals.

Research Assistant, UC Davis Plant Sciences, June - August 2011

- Developed procedures and software for testing the physical attributes of fruit.

Invited Talks	<hr/> <p>“Multi-task learning, transfer, and abstraction,” <i>Parallel Distributed Processing and the Emergence of an Understanding of Mind</i>, Princeton University, September 29th, 2018</p> <p>“The Jabberwocky: One-shot and few-shot learning of word embeddings,” <i>Meaning in Context Workshop</i>, Center for the Study of Language and Information, Stanford University, September 12th, 2017</p> <hr/>
Presentations	<hr/> <p>“Automated curricula through setter-solver interactions,” <i>8th International Conference on Learning Representations</i>, 2020</p> <p>“Environmental drivers of systematicity and generalisation in a situated agent,” <i>8th International Conference on Learning Representations</i>, 2020</p> <p>“Zero-shot task adaptation by homoiconic meta-mapping,” <i>Learning Transferable Skills Workshop, NeurIPS</i>, 2019</p> <p>“An analytic theory of generalization dynamics and transfer learning in deep linear networks,” Natural / Artificial Intelligence, Stanford Neurosciences Institute, 2018</p> <p>“An analytic theory of generalization dynamics and transfer learning in deep linear networks,” <i>Parallel Distributed Processing and the Emergence of an Understanding of Mind</i>, Princeton University, 2018</p> <p>“Analogies emerge from learning dynamics in neural networks,” 39th Annual Meeting of the Cognitive Science Society, 2017</p> <p>“Fast and sparse learning with compositional concept training,” 15th Neural Computation and Psychology Workshop, 2016</p> <hr/>
Teaching Experience	<p>Teaching Assistant, Stanford University Department of Psychology, 6 courses between Fall 2016 and Winter 2019</p> <ul style="list-style-type: none"> • Planned and taught discussion sections for undergraduate statistics & memory courses and graduate statistics & research methods courses. • Gave lectures on reinforcement learning and wrote and graded homeworks for graduate course on Neural Network Models of Cognition. • Held office hours. <p>Undergraduate Student Instructor, UC Berkeley Mathematics, Spring, Fall 2013, & Spring 2014</p> <ul style="list-style-type: none"> • Planned and taught discussion sections. • Held office hours. • Wrote and graded quizzes and midterms. <p>Teaching Assistant, UC Berkeley Early Academic Outreach Program, June-July 2013</p> <ul style="list-style-type: none"> • Held office hours. • Substitute taught classes. <hr/>
Other Work Experience	<p>Statistics Consultant, Stanford University Department of Psychology, 2016-2017, 2019-2020</p> <ul style="list-style-type: none"> • Advised graduate students on technical aspects of data collection, analysis, and modeling. <hr/>
Service	<p>Reviewer:</p> <ul style="list-style-type: none"> • Journal of Educational Psychology. • Artificial Intelligence. • Neural Information Processing Systems, 2020. • Cognitive Science Society, 2019 & 2020. • Conference on the Mathematical Theory of Deep Neural Networks (DeepMath), 2019

Technical Skills

Computer science: Experienced with both theory and practice.

- Graduate coursework in machine learning, neural networks, and probabilistic models & algorithms.
- Experienced user of Python, R, C++, C, JavaScript, Matlab, some knowledge of Mathematica, Macaulay2, Haskell.
- Used many common libraries for these languages, e.g. numpy, scipy, tidy, dplyr, jquery, matplotlib, Matlab Computer Vision Toolbox, FFTW.
- Used many machine learning libraries, including TensorFlow, Torch, scikit-learn, and Caffe.
- Experienced with *NIX operating systems.

Mathematics: Knowledge across many domains, with applications.

- Algebraic geometry, group theory, category theory, topology, etc.
- Practical applications to machine learning, computer vision, neural coding, etc.

Statistics: Significant experience with standard data analysis techniques.

- Linear modeling, hierarchical modeling, etc.
- Fitting algorithms & goodness-of-fit tests.

Physics: Experienced in a wide variety of applied and experimental contexts.

- Statistical mechanics, biophysics, analytic mechanics, etc.
- Experimentation ranging from NMR to quantum entanglement.

Modeling & Simulation: Developed models and simulations of various phenomena.

- Developed both from published methods and directly from physical principles.
-

Other Activities

Carillon: Carillonneur member of the Guild of Carilloneurs in North America (www.gcna.org).

Rock climbing: Bouldering, sport, and trad. Routesetter at Stanford Climbing Wall, set problems for Collegiate Climbing Series events.
